## WHY A SMART MEETING ROOM?

Smart Meeting Room Solution is to help our customers manage their meeting and conference spaces by best utilizing its facilities and to provide more convenient environment for their guests. Coordinate professionals for climate, lighting, shutters, sunshades, air quality, multimedia, ...etc.

Compatible with standard interfaces and connections, such as switch and sockets, network, USB, telephone, and TV connections.

### MEETING ROOMS OPERATORS WILL BENEFIT FROM:

- Making audiences feeling more comfortable.
- Energy saving.
- Adjustable meeting environment with couple of clicks.

### SAVINGS

By applying cost-effective, and energy-efficient technologies that work together to employ and reduce consumption throughout pre-defined scenes that will always maintain the right conditions.

### COMFORT AND FLEXIBILITY

Control all systems from a single interface. Pre-defined scenes that are customized to meet conditions as per the client desire. They will act to fulfil the meeting room users needs without any interaction from the user.

### ALARMS

Alarms detection of smoke, gas, fire, flood, intrusion. Automatic outage and warning to user. Keep an eye on every smart device connected that is alive.
