Gold and white

Superior Quality

We ensure the superior quality of our products by using engineered robust thermoplastic that is durable, flexible, and the resilience to withstand hard impacts, flame retardant and built to last.

Inline Terminals

Inline terminals provide easy wiring and installation.

Protective Safety Shutters

Banan socket outlets feature safety shutters to close off the contact openings for protection against the risk of electric shock. The tamper resistant shutters prevent children, and adults, from poking foreign objects into the socket.

The spring-loaded shutters are designed to remain in a closed position until a plug is inserted.

Make/Break

Silver alloy rivet contacts are used in make / break areas, which helps in contact life.

Wire Strands

Wire Strands feature provides more protection and better wire grip.

Anti-Loosening Mechanism

The socket's inner copper contacts are made of phosphor bronze, skillfully crafted to maintain its flexibility and compression with the plug terminals, preventing loosening over time and extend the product's life.

Wiring space

Compact design, allows the product with >5mm ID height fits in 25mm box

Funnel Shape for Easy cable Insertion

Funnel shape provided in socket housing for easy cable insertion.

Ordering Tip

To construct an order code, add the digits color code to the product code.

Example :

BB101 is the product code for a **10A 1W switch 1 gang**

7X7 and **275** is the color code for black color with white ring.

The order code will be: **BB101-275**

White Colors

White with
